Foot reflexology

Reflexology is tailored to you as a whole person. Some people find it works for them, some don't. The best way to find out is to try it!

The theory is that reflexology helps the body to restore its balance naturally. Usually, after a treatment, your tension may be reduced and you might feel relaxed. You might also notice yourself sleeping better and find your mood and sense of wellbeing improving. You may also find that other aspects improve too; however, this happens on an individual basis.

Reflexology works on reflex points on your feet that are thought to relate to specific organs and glands in the body. Stimulating those points with finger pressure promotes health in those organs and glands via the body's energetic pathways. Reflexology is a deeply relaxing treatment with benefits that can be felt throughout the body. Reflexology should not be used as an alternative to seeking medical advice.

Microblading

Microblading is the latest, revolutionary, freehand, feather-styling technique. A microblading treatment gives a natural brow look and is unlike any other semi-permanent makeup technique.

microblading is a semi-permanent procedure that can last between 12–18 months and, unlike other techniques, is not reliant upon natural hair being present. This makes the microblading treatment perfect for those suffering from alopecia, trichotillomania, or any other condition that causes hair loss.

microblading gives the effect of ultra-fine, delicate hair strokes that blend flawlessly with your natural brow. Using the natural ‘landscape’ of the brow – be that too thin, too plucked, or too patchy – microblading allows the eyebrow shape to be restored. And, if your brows are gone completely, microblading will re-create an entirely new brow for you.

Using a specially designed micro-blade, natural 3D hair strokes are placed under the epidermis for the ultimate tailored brow. The pigments used in the microblading treatment have been specially formulated to match the original eyebrow in order to achieve a natural look. This cutting-edge treatment is ideal for enhancing and defining brows and you are in complete control of how you wish your bespoke brows to look.
